Applicable from fast response measurement to multi-weighing with high accuracy!

FC400-CCL-FA　A measurement system can be configured easily using CC-Link network.
FC400-DAC-FA　Either voltage or current output, corresponding to the indicated value, is available.
FC400-EIP-FA　A measurement system can be configured easily using EtherNet/IP network.
FC400-ECT-FA　A measurement system can be configured easily using EtherCAT network.
FC400-232-FA　Measured data and results can be collected using RS-232C network.

High sampling rate & resolution

High-Speed A/D conversion and powerful digital processing capability of 2400 times/sec.
High display resolution of 1/100000 (max).

Measurement can be performed quickly and precisely due to high speed A/D conversion.

Application software for USB interface

With communication through USB interface, logging, graph display, setting parameters, and calibration can be done.

High performance filter & auto filter adjustment

With combination of low pass filter (0.1 to 600 Hz) which corresponds to various vibration and moving average filter (OFF, 2 to 999) that is effective for periodic vibration, automatic searching for optimal value with accuracy and stability can be achieved.
(You can manually adjust settings too)

The readings fluctuate….

By simply pressing the auto adjustment key….

Stabilized!

Compact size

It can be fit into a limited space!
Light weight & compact body for 35 mm DIN rail mount.
