F325 DIGITAL INDICATOR WITH FAST PEAK HOLD FUNCTION

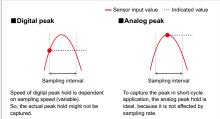

- Hi-speed A/D conversion rate of 3000 times/sec. (resolution: 24 bit)
- The high-performance filtering functions by using both analog and digital technology
- Cover wide range of applications: fast response time and high accuracy
- Free software for parameter setting is available

Analog peak hold

The peak of analog signal is captured by the peak hold circuit. Since it is independent of sampling speed, it can hold the peak value at faster speed.

■Fast response

F325 processes the analog peak hold value at the speed of 3000 times/sec. and ouputs HI/OK/LO signal.

It is ideal for the application with short cycle time.

■ High-accuracy

It can be also used for highly accurate weighing system by adjusting A/D conversion rate.

| Analog | Excitation voltage | |
|----------------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | Signal input ran | |
| | Accuracy Non- | |
| | | Zero drift: Within 0.5 μV/°C RTI, Gain drift: Within 25 ppm/°C |
| | A/D converter | Speed: 30, 300, 3000 times/sec. (Depending on setting), Resolution: 24 bit (binary) |
| | Analog filter Digital filter | Primary low-pass filter (select frequency from 10 Hz, 30 Hz, 100 Hz, 300 Hz, 1 kHz, 3 kHz, 10 kHz, 30 kHz) |
| | Digital filter | Filter1: Bessel low-pass filter (secondary) |
| | | Cut-off frequency can be set to any value from 1/300 to 1/10 of sampling speed. (It can be turned off.) 3000 times/sec.: 10 to 300 Hz, 300 times/sec.: 1 to 30 Hz, |
| | | 30 times/sec.: 0.1 to 3 Hz Filter2: Moving average, You can set the value anywhere between OFF, 2 to 999 times. |
| | Resolution | 1/30000 (at 3.0 mV/V input) |
| | Analog monitor output | Sensor input of approx. 2 V per 1 mV/V Input resistance over 2 k Ω or more |
| | Hold function | Sample or peak hold (You can chose either analogue or digital peak hold |
| | | from setting menu. Frequency response of analog hold is 1 kHz) |
| Display | Display unit | 15 mm character height: 7-segment green LED (5-digits) |
| | | Numerical value: 5-digits Indicated value: -19999 to +99999 |
| | | Decimal points: Selectable decimal point displaying position (0.000, 0.00, 0.0, 0) |
| | Display items | Status display: Red LED: HI, LO, PEAK, HOLD, Green LED: OK |
| | | Display frequency: Selectable from 3, 6, 13 and 25 times/sec. |
| External | External input | DZ, HOLD, H.RESET |
| I/O signal | (3) | <volt-free contact="" input=""> External devices can be connected, such as relays, switches, transistors and so on. The signal can be outputted by making short-circuit between input and common terminal. In case transistor is connected, please use NPN (sink) transistor. Internal power supply voltage: DC 12 V, When short-circuited: Approx. 4 mA <dc-input and="" both="" common="" for="" minus="" plus="" type=""> (please specify the type of input when ordering) External devices can be connected, such as relays, switches, transistors and so on. Input signal is outputted by applying voltage between input and common terminal.</dc-input></volt-free> |
| | | In case a transistor is connected, please use NPN type for plus common and PNP type for minus common. Maximum Rated Voltage: DC 27.6 N, "ON"; when the voltage is above DC 9 V (Load Current: approx. 10 mA at DC 24 V), "OFF: " below DC 3 V. |
| | | HI, OK, LO, Output Selection 1, Output Selection 2 |
| | (5) | (Assign output from various selection: HH, LL, Overload, RUN, HOLD, NZ, DZ response) PhotoMOS relay output (common for sink and source type) Maximum rated voltage: DC 30 V, maximum rated current: 100 mA, operating time: approx. 1 msec |
